

## 38.0 COMBINATION OF EMISSIONS

### 38.1 General

- A. If air contaminants from two or more source operations are combined prior to emission and there are adequate and reliable means reasonably susceptible to confirmation and use by the Director for establishing a separation of the components of the combined emission to indicate the nature, extent, quantity, and degree of emission arising from each such source operation, these regulations apply to each such operation separately.
- B. If air contaminants from two or more source operations are combined prior to emission and the combined emission cannot be separated according to the requirements of Paragraph 38.1-A, these regulations shall be applied to the combined emission as if it originated in a single source operation subject to the most stringent limitations and requirements placed by these regulations on any of the source operations whose contaminants are so combined.
