
Need a Speaker?

Knox County has experienced and knowledgeable staff willing to present information to your group about why and how to protect the streams, rivers, lakes and wetlands found throughout the county.

Audiences of all ages are accommodated. Topics range from technical and regulatory to do-it-yourself projects for homeowners. We can fit into your program or be the featured presenter. Specific presentations cover rain gardens, native plants along streams, Adopt-A-Stream program, green-friendly landscaping and many others.

Groups we have worked with include garden clubs, homeowner and business associations, scouts, and schools.

If you have an idea or an upcoming event, please contact us and we will work with you to incorporate clean water into your program.
